REASONS FOR ALLOWANCE

1. Applicant's amendment filed January19, 2006 has been entered and made of record.

2. The following is an examiner's statement of reasons for allowance:

Independent claims 67, 68, 32, 39, 41, 43, 46, 54, 56, and 59 are allowable over the prior art of record. Claims, which depend from these independent claims, are therefore allowed.

Independent claims 32 and 46 recite the limitations of: wherein the step of producing modified coefficient values does not use coefficients of magnitude greater than the said threshold T and does not use the corresponding information symbols of the pseudo random symbol sequence. The combination of these features as cited in the claims in combination with the other limitations of the claims, are neither disclosed nor suggested by the prior art of record. Inoue et al. ("A Digital Watermark Based on the Wavelet Transform and its Robustness on Image Compression", hereinafter Inoue) discloses embedding watermark data in only those coefficients having a magnitude less than a predetermined threshold. Donescu et al. (PN 6,674,873, hereinafter Donescu) discloses producing the modified coefficient values by adding an offset to the coefficients, wherein the offset is an information symbol of a pseudo random symbol sequence modulated by the watermark data. The combination of these two references fails to disclose omitting pseudo random symbols corresponding to the coefficients

above the threshold. Instead the combination of these references would suggest that all symbols be used regardless of which coefficients are chosen for embedding.

Independent claims 39, 54, and 59 recite the limitations of: wherein the correlating step does not use coefficients of magnitude greater than the said threshold T and corresponding symbols of the pseudo random symbol sequence. The combination of these features as cited in the claims in combination with the other limitations of the claims, are neither disclosed nor suggested by the prior art of record.

Independent claims 41, 43, and 56 recite the limitations of: correlating the clipped and unclipped coefficients with a pseudo random symbol sequence to detect data embedded in the information signal. The combination of these features as cited in the claims in combination with the other limitations of the claims, are neither disclosed nor suggested by the prior art of record.

Independent claims 67 and 68 recite the limitations of: calculating modified coefficient values where alpha is calculated dependent on the value of S being positive and negative to identify a corresponding binary value of the data symbol being embedded. The combination of these features as cited in the claims in combination with the other limitations of the claims, are neither disclosed nor suggested by the prior art of record.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
